

EXPLORING MARINE LIFE

In the centre we also run many exciting in-water activities that feature Marine Biology as well as providing entertaining and informative presentations. We are also developing a program of Marine Biology projects which will include ongoing research and reef monitoring and have initiated a turtle coral tray adoption program. Interested guests are very welcome to participate in these programs.

Our belief is that you should not leave Velassaru without having the opportunity to discover first-hand the exceptional aquatic life of the Maldives! So if you want to experience Marine life, come and join our critter-mad Biologist on many of our guided BIO activities. Our approach is "get WET, have FUN and experience it LIVE!"

Please note: all prices are per person quoted in US\$, are exclusive of 10% service charge and 12% GST.

DOLPHIN DISCOVERY

Learn the basics about spinners and bottle nose and hop on-board to hopefully watch them in their own habitat on this one and a half hour trip.

Trip	44
------	----
